

RenewSys Receives UL Approval on Aluminium Foil Backsheet?

RenewSys, Bangalore, India, the quality manufacturer of EVA Encapsulant 'CONSERV' and Backsheets 'PRESERV' receives UL approval on its Aluminium Foil backsheets. This is a Fluoro and Aluminium Foils based backsheet especially developed to exhibit extremely low moisture permeation for Thin Film modules. The moisture permeation of the backsheet is ZERO with exceptionally high dimensional stability. The estimated RTI of the backsheet is more than 120 degree C., suitable for high life service temperature needed for Thin Film Modules. Though the product has been developed on demand of an international module manufacturer, it is free to be sold to other module makers and applications on demand.

RenewSys has already been selling IEC and UL certified 'EVA Encapsulants and Backsheets in domestic and overseas markets witnessing encouraging business growth since its inception.

With a commitment to provide innovative & technology driven solutions, **RenewSys** has invested significantly in setting up a R&D centre at its Bengaluru facility. This enables RenewSys partner with its clients to create customized solutions for mutual benefit and contribute in taking the industry forward.
