

RenewSys receives UL Approval for Its Backsheets

RenewSys, the quality manufacturer of EVA Encapsulant and Backsheets based at Bengaluru, India has announced the UL approval of its 'PRESERV' Backsheet range as per U-94 guidelines. The company had recently launched its Fluoro and Non-Fluoro material based Backsheets. With this approval, the company has Backsheets with Partial Discharge values suitable for 1000 VDC system voltage modules in addition to economically priced Backsheets for 600 VDC system voltage modules.

RenewSys has already been selling TUV and UL certified 'CONSERV' EVA Encapsulant in domestic and overseas markets witnessing encouraging business growth since its inception. With the launch of the certified wide range of Backsheets, the company feels it would be a great advantage for module makers to buy both the components from a single source eliminating issues relating to quality, inventory and logistics. Many domestic and overseas modules makers have appreciated the move and acknowledged these advantages.

With a commitment to provide innovative & technology driven solutions, **RenewSys** has invested significantly in setting up a R&D centre at its Bengaluru facility. This enables RenewSys partner with its clients to create customized solutions for mutual benefit and contribute in taking the industry forward.
