

RenewSys to provide PPE kits for the next 6 months across 21 Eye Hospitals and Vision centers

Contribution of over INR 53 Lakh will ensure supply of PPE for the next 6 months for doctors, nurses and staff at 10 Sankara Eye Hospitals and 11 Vision Centres across India

Mumbai, July 2020: The fight against COVID 19 continues even as the unlocking phase has begun across India. RenewSys, the renewable energy division of the ENPEE Group, has been undertaking initiatives on various fronts to safeguard the health and overall wellbeing of its stakeholders and of communities across India.

In an effort to support the continued smooth functioning of subsidized eye care treatment, RenewSys has made a contribution of INR 53 Lakh towards providing personal protection equipment for the doctors, medical and non- medical staff at the 10 Sankara Eye Hospitals and 11 vision centres pan India, that it has been closely associated with and has been supporting along with the ENPEE Group.

The PPE will be directed through Mission for Vision a not-for-profit organization that works on eradicating avoidable blindness in 20 Indian states.

The PPE items that will be purchased include:

1. SS96 Mask: Particulate-filtering facepiece respirator that filters most airborne particles
2. Nitrile gloves: Prevents the contamination of hands from cough/ sneeze droplets, chemicals and other items
3. Visors: Helps protect the wearer's face from exposure to cough/sneeze droplets, splashes and sprays.

In May 2020, RenewSys had supported the local police force at Jigani, Bengaluru where its plant is located, with 300 grocery kits that included essential items such as atta, rice, dal, sugar, soap.

Speaking on the occasion of these substantial contributions, Mr. Sanjay Kirpalani, Chairman, RenewSys India and ENPEE Group and Mr. Arun Lakhani, Director, said, "Whilst massive efforts are ongoing, challenges will continue to arise as we establish a new normal post-COVID 19. In such an environment, being able to ensure comfort to those who are on the frontlines of civic service and hospital care is crucial and a priority for us.

This contribution is a sign of our lasting, resolute commitment to support a global recovery from this pandemic and the consequences thereof. It is a part of a larger pursuit to ensure the continued wellbeing and betterment of our teams, their families, customers, vendors, stakeholders and the communities we associate with.

We hope that this contribution will bring some measure of reassurance to doctors and caregivers, as well as the patients who visit these facilities for treatment.”

Ms. Elizabeth Kurian, CEO, Mission for Vision shared her thoughts, “The ENPEE Group has been a longstanding partner in our vision towards eradicating avoidable blindness. The lack of PPE prevents frontline staff from providing eye-care services to marginalized communities and this increases the risk of these communities becoming visually impaired and thereby further socioeconomically compromised. We are very grateful for RenewSys India and ENPEE Group’s generous support in procuring PPE for our projects in India.

This will help us ensure that our doctors, optometrists and patients are well-protected from the highly virulent Coronavirus and we can continue providing uninterrupted services to vulnerable communities in need of eye health.”

Mr. Avinash Hiranandani, Global CEO and Managing Director, RenewSys India added, “RenewSys understands the essential role that businesses can play in these challenging times and we are committed to bolstering the efforts to combat this pandemic on both the health and economic well-being fronts.

Even as business has resumed we will continue to pitch in for the wellbeing of our employees and customers, prioritizing social distancing, transport, sanitation and other health-related best practices.

We are also in advanced discussions to expand our manufacturing footprint in India in keeping with the Hon. Prime Minister Modi’s call to be ‘vocal for local’ and promoting solar manufacturing independence.”

About Mission For Vision:

Mission for Vision (MFV) is a leading not-for-profit organisation that has been working since 2000 towards the eradication of avoidable blindness. MFV has acted as a catalyst by strengthening several institutions towards excellence through equitable services. It was founded on the basis that poverty is a cause and effect of visual and other disabilities that in-turn increase social divide. Eradicating avoidable blindness will enhance productivity, significantly impact on GDP and promote social and economic equity among nations. MFV works in 20 Indian states with 35 of the most reputed charitable eye hospitals in India to annually impact over 780,000 persons and enabled over 2.2 million cataract eye surgeries until date.
