

RenewSys Showcases Its PV Modules and Components at Intersolar Europe 2016

RenewSys, a quality manufacturer of PV modules, EVA Encapsulants, Backsheets and Cr-Si cells, proudly showcases its latest products and innovations at **Intersolar, Europe 2016**.

RenewSys has two state-of-the-art facilities located strategically at Bengaluru (manufacturing EVA Encapsulants and Backsheets) and at Hyderabad (manufacturing PV modules and PV cells). The company believes in innovative, technology-driven products and has invested significantly in setting up a Polymer specialized R&D Centre at the Bengaluru facility and a Photovoltaic specialized R&D Centre at its Hyderabad facility.

In addition to regular Encapsulants, the company has developed variants like PID Resistant, POE and UV Transparent Encapsulants in line with the market demand. A wide range of Backsheets are also developed, suiting the various PV module technologies like Cr-Si, Thin Film, MWT and “bifacial cell” modules.

The company is currently installing tools to increase the cell line capacity to 130 MW and module line capacity to 180 MW in the first phase.

RenewSys' efforts to service its customers with quality and innovation have enabled it to win the following prestigious awards: 'Domestic Manufacturing Company of the Year' & 'Solar Module Backsheet Company of the Year'.

RenewSys looks forward to your esteemed presence at **Intersolar, Europe: Booth A1-712** to share its aspirations and capabilities as well as explore the possibility of working together.
