

### **RenewSys launches new EVA Encapsulants and Backsheets in Intersolar Munich 2014:**

**RenewSys**, an ISO certified company and quality manufacturer of 'CONSERV' (EVA Encapsulant) and 'PRESERV' (Backsheet) for Photovoltaic Modules has added new products to cover a wider range of PV applications. The company has successfully commercialised its Ultra-Fast curable Encapsulant in Indian and international markets recently. Its Ultra-Fast Encapsulant offers above 85% gel content in a total cycle time of 10 min. Customers have expressed their full satisfaction stating that this is the best product in the market in its range. UL approval of this product is expected soon.

To extend its product in the Thin-Film modules segment, the company has successfully developed metallic backsheet for CIGS Glass to Glass modules. The product is currently at final stage of testing at the customer's facility and expected to get commercialized by Q2 2014. This product has already been approved by the UL.

In the backsheet range, the company has also launched Black backsheets in its Fluoro and Non-Fluoro series. The UL approval on all the variants in both the series has already been received. The company has also expressed that more innovative products are in pipeline.

Leveraging decades of expertise in Polymers, the CONSERV™ range of EVA Encapsulants and 'PRESERV' range of Backsheets developed by RenewSys has proven unmatched consistency and long term performance in field. In terms of strengths of its consistent and innovative products, the company is already a dominant force in the domestic market; and has gained significant volumes in international market in a short span of time since its inception. RenewSys has a worldwide distribution and customer-service network along-with warehousing facilities.

The company has a world class manufacturing facility at Bengaluru, India boasting an array of state-of-the-art European technology and equipment.

With a commitment to provide innovative & technology driven solutions, RenewSys has significantly invested in setting up an impressive R&D centre at its facility in Bengaluru. This enables RenewSys to partner with its clients and create customized solutions, which largely benefit the mutual development of products and contributes to taking this industry forward.

Please visit booth no. **A3 . 510**, Intersolar, Munich, June 4 - 6, 2014 for an interactive discussion on new products.
